FACULTY OF SCIENCES

MATHEMATICS AND COMPUTER SCIENCES DEPARTMENT

COURSE INFORMATION FORM

Course Name				Course Code		
	Fundamental Groups II					
	Number of Cou	Course Hours per Week		a b		
Semester	Theory	Practice		Credit	ECTS	
8	2	2			6	
Course Category (Credit)						
Basic Sciences	ic Sciences Engineering Design		Gener	General Education Social		
x						
X						
Course Lang	guage	Course Level		Co	ourse Type	

Prerequisite(s) if any	
Objectives of the Course	The main of the course is to introduce the concepts and techniques involved in the basic topics listed in this lecture and to develope skills in applying those concepts and techniques to the solution of problems
Short Course Content	Connected Spaces, Paths and Path connected spaces, Homotopies of continuous functions, Homotopies of paths, Homotopy groups, Fundamental groups,

	Learning Outcomes of the Course	Contributed PO(s)	Teaching Methods *	Measuring Methods **
1	Have sufficient knowledge in Topological Spaces.	1,2	1,2	А
2	Learn the homotopy structure	1,2	1,2	А
3	Develops ability to analyze and solve problems encountered	3,4,5,9	2,10	А
4	Analytical thinking skills develop and the ability to make individual and independent decisions develops.	3,4,5,9	10,11	А
5	The ability to analyze and interpret data, apply interpretation to other data, and apply this information in a computer environment develops.	13	10,11	А
6				
7				
8				

^{*}Teaching Methods 1:Expression, 2:Discussion, 3:Experiment, 4:Simulation, 5:Question-Answer, 6:Tutorial, 7:Observation, 8:Case Study, 9:Technical Visit, 10:Trouble/Problem Solving, 11:Induvidual Work, 12:Team/Group Work, 13:Brain Storm, 14:Project Design / Management, 15:Report Preparation and/or Presentation

^{**}Measuring Methods A:Exam, B:Quiz, C:Oral Exam, D:Homework, E:Report, F:Article Examination, G:Presentation, I:Experimental Skill, J:Project Observation, K:Class Attendance; L:Jury Exam

Main Textbook	A First Course in Algebraic Toplogy, Czes Kosniowsky
Supporting References	 Topology, James R. Munkres Essential Topology, Martin, D. Crossley
Necessary Course Material	

Course Schedule					
1	Homotopy				
2	Homotopies of continuous functions				
3	Paths and multiplication of paths,				
4	Homotopies of paths,				
5	Characteristics of homotopies				
6	Homotopy Equivalances				
7	Problem Solving				
8	Midterm				
9	Homotopy groups,				
10	Fundamental groups				
11	Problem Solving				
12	Fundamental groups of product spaces				
13	Fundamental group of circle				
14	Examples of Fundamental group				
15	Problem solving				
16,17	Final Exam				

Calculation of Course Workload				
Activities	Number	Time (Hour)	Total Workload (Hour)	
Course Time (number of course hours per week)	14	4	56	
Classroom Studying Time (review, reinforcing, prestudy,)	14	4	56	
Homework				
Quiz Exam				
Studying for Quiz Exam				
Oral exam				
Studying for Oral Exam				
Report (Preparation and presentation time included)				
Project (Preparation and presentation time included)				
Presentation (Preparation time included)				
Mid-Term Exam	1	1	1	
Studying for Mid-Term Exam	1	20	20	
Preparing Homework	1	16	16	
Final Exam	1	1	1	
Studying for Final Exam	1	30	30	
	Т	Total workload		
	Total	Total workload / 30		
	Course	Course ECTS Credit		

Evaluation			
Activity Type	%		
Mid-term	40		
Quiz			
Homework	10		
Bir öğe seçin.			
Bir öğe seçin.			
Final Exam	50		
	Total 100		

Г

NOPROGRAM OUTCOMEControl1The ability to apply knowledges of Mathematics and Computer Sciences,42To have sufficient theoretical and practical knowledge of Mathematics at international level,53The ability of describing, modelling and solving of mathematical problems at Mathematics54The skill to solve and design a problem process in accordance with a defined target,55Skills to analyze data, interpret and apply to other datum and using these data on computer,46The skill to use the modern techniques and computational tools needed for mathematical applications.27The skill to make team work within the discipline and interdisciplinary,28The ability to improve oneself by following the developments on other modern, scientific and technological subjects as well as Mathematics and Computer Sciences,29The skill to communicate orally and in written way, in a clear and concise manner by having individual work skills and ability to independently decide and analytical thinking, individual work skills and ability to independently decide and analytical thinking,210The skill to bave professional and ethical responsibility,211The skill to bave consciousness for quality issues and scientific research,112The skill to be sensitive to environmental issues related with problems and development of living area and consistent in the social relations,113Ability to solve problems in the working life faced to find an appropriate algoritms via mathematical modeling and to write computer programs,414Th	RELATIONSHIP BETWEEN THE COURSE LEARNING OUTCOMES AND THE PROGRAM OUTCOMES (PO) (5: Very high, 4: High, 3: Middle, 2: Low, 1: Very low)				
112To have sufficient theoretical and practical knowledge of Mathematics at international level, and related subjects,53The ability of describing, modelling and solving of mathematical problems at Mathematics and related subjects,54The skill to solve and design a problem process in accordance with a defined target, Skills to analyze data, interpret and apply to other datum and using these data on computer, 	tribution				
2The ability of describing, modelling and solving of mathematical problems at Mathematics and related subjects,54The skill to solve and design a problem process in accordance with a defined target, 555Skills to analyze data, interpret and apply to other datum and using these data on computer, 446The skill to use the modern techniques and computational tools needed for mathematical applications,37The skill to make team work within the discipline and interdisciplinary, technological subjects as well as Mathematics and Computer Sciences, 928The skill to communicate orally and in written way, in a clear and concise manner by having individual work skills and ability to independently decide and analytical thinking, 10211The skill to be sensitive to environmental issues related with problems and development of living area and consistent in the social relations, 13113Ability to solve problems in the working life faced to find an appropriate algoritms via mathematical modeling and to write computer programs,1					
3and related subjects,54The skill to solve and design a problem process in accordance with a defined target,55Skills to analyze data, interpret and apply to other datum and using these data on computer,46The skill to use the modern techniques and computational tools needed for mathematical applications,37The skill to make team work within the discipline and interdisciplinary,28The ability to improve oneself by following the developments on other modern, scientific and technological subjects as well as Mathematics and Computer Sciences,29The skill to communicate orally and in written way, in a clear and concise manner by having individual work skills and ability to independently decide and analytical thinking,210The skill to have professional and ethical responsibility,211The skill to be sensitive to environmental issues related with problems and development of living area and consistent in the social relations,113Ability to solve problems in the working life faced to find an appropriate algoritms via mathematical modeling and to write computer programs,1					
4The skill to solve and design a problem process in accordance with a defined target,55Skills to analyze data, interpret and apply to other datum and using these data on computer,46The skill to use the modern techniques and computational tools needed for mathematical37The skill to make team work within the discipline and interdisciplinary,28The ability to improve oneself by following the developments on other modern, scientific and technological subjects as well as Mathematics and Computer Sciences,29The skill to communicate orally and in written way, in a clear and concise manner by having individual work skills and ability to independently decide and analytical thinking,210The skill to have professional and ethical responsibility,211The skill to be sensitive to environmental issues related with problems and development of living area and consistent in the social relations,113Ability to solve problems in the working life faced to find an appropriate algoritms via mathematical modeling and to write computer programs,1					
5The skill to use the modern techniques and computational tools needed for mathematical6The skill to use the modern techniques and computational tools needed for mathematical7The skill to make team work within the discipline and interdisciplinary,28The ability to improve oneself by following the developments on other modern, scientific and technological subjects as well as Mathematics and Computer Sciences,9The skill to communicate orally and in written way, in a clear and concise manner by having individual work skills and ability to independently decide and analytical thinking,10The skill to have professional and ethical responsibility,211The skill to have consciousness for quality issues and scientific research, living area and consistent in the social relations,113Ability to solve problems in the working life faced to find an appropriate algoritms via the avelopeed design of coffusion at develop and to write computer programs,1					
0applications,27The skill to make team work within the discipline and interdisciplinary,28The ability to improve oneself by following the developments on other modern, scientific and technological subjects as well as Mathematics and Computer Sciences,29The skill to communicate orally and in written way, in a clear and concise manner by having individual work skills and ability to independently decide and analytical thinking,410The skill to have professional and ethical responsibility,211The skill to have consciousness for quality issues and scientific research, living area and consistent in the social relations,113Ability to solve problems in the working life faced to find an appropriate algoritms via mathematical modeling and to write computer programs,1					
7Interval and a second relation of the seco					
8technological subjects as well as Mathematics and Computer Sciences,9The skill to communicate orally and in written way, in a clear and concise manner by having individual work skills and ability to independently decide and analytical thinking,10The skill to have professional and ethical responsibility,211The skill to have consciousness for quality issues and scientific research,212The skill to be sensitive to environmental issues related with problems and development of living area and consistent in the social relations,113Ability to solve problems in the working life faced to find an appropriate algoritms via mathematical modeling and to write computer programs,1					
9The skill to communicate orally and in written way, in a clear and concise manner by having individual work skills and ability to independently decide and analytical thinking,410The skill to have professional and ethical responsibility,211The skill to have consciousness for quality issues and scientific research,212The skill to be sensitive to environmental issues related with problems and development of living area and consistent in the social relations,113Ability to solve problems in the working life faced to find an appropriate algoritms via mathematical modeling and to write computer programs,1					
10The skill to have professional and ethical responsibility,211The skill to have consciousness for quality issues and scientific research,212The skill to be sensitive to environmental issues related with problems and development of living area and consistent in the social relations,113Ability to solve problems in the working life faced to find an appropriate algorithms via mathematical modeling and to write computer programs,1					
11 The skill to be sensitive to environmental issues related with problems and development of 1 12 The skill to be sensitive to environmental issues related with problems and development of 1 13 Ability to solve problems in the working life faced to find an appropriate algoritms via 4 13 Mathematical modeling and to write computer programs, 1					
12 living area and consistent in the social relations, 13 Ability to solve problems in the working life faced to find an appropriate algoritms via 4 mathematical modeling and to write computer programs, The skill to developed design of software systems at different complex levels					
13 Ability to solve problems in the working life faced to find an appropriate algoritms via 4 mathematical modeling and to write computer programs, 4 The skill to developed design of software systems at different complex levels 1					
The skill to developed design of software systems at different complex levels					
15 The credence of necessity of life-long learning and ability to apply the formation long-life 1 learning.
